About Me

My name is Muhammad Abdullah Haroon, and I am a BS Mathematics student at Bahauddin Zakariya University. My father, Muhammad Iqbal, is a Food Grain Inspector. We are three siblings, and growing up in a supportive family has taught me cooperation, responsibility, and mutual respect. I am interested in applying mathematical and data-driven approaches in education and finance. I participated in the Payum Iqbal Intradepartmental Speech Competition, which helped me improve my presentation and public-speaking abilities. I enjoy working in teams, learning new concepts, and using data to support smart and effective decision-making
