

MUHAMMAD ABDULLAH HAROON

BS MATHEMATICS STUDENT

ABOUT ME

I'm a BS Mathematics student at Bahauddin Zakariya University (BZU), Multan. Alongside my studies, I independently design and build technical projects — including INFINITY-X, a self-learning AI chatbot with a multi-mode architecture and HARNECT, a full-stack social media web application. I'm currently gaining hands-on professional experience as a Branch Service Intern at Meezan Bank, where I manage customer account opening and work with the bank's internal systems.

Backed by a strong math foundation and hands-on experience in Python, Flask, and web development, I like learning tools deeply enough to build with them. I'm exploring opportunities in tech, AI, and finance — and open to connecting with people working on interesting problems.

EDUCATION

B.S. Mathematics (7th Semester)

2023 – 2027

Bahauddin Zakariya University (BZU), Multan

Core subjects: Calculus, Data Analysis, MATLAB

Intermediate (FSc Pre-Engineering)

2021 – 2023

Government Post Graduate College, Khanewal

Major subjects: Mathematics, Physics, Chemistry

EXPERIENCE

Intern — Meezan Bank

4 Jul 2026 – 16 Aug 2026

Handle account opening for new customers, ensuring accuracy and compliance with bank procedures. Operate internal banking software to process account records. Gained hands-on exposure to real-world banking operations

Volunteer — Job Fair Event

17 APRIL 2025

Bahauddin Zakariya University (BZU), Multan

Volunteered at the university's Job Fair event, assisting with event coordination and helping connect students with participating organizations.

PROJECTS

HARNECT — Social Media Web App

An Instagram-inspired social media website featuring user profiles, posts, and a content feed, built to practice full-stack web development concepts.

INFINITY-X — AI Chat Learning Bot

An AI-powered chatbot that chains multiple language model APIs to provide conversational learning assistance, designed for reliability using fallback models when primary services are unavailable.

Static Websites

Designed and developed multiple static websites using HTML5, CSS3, and JavaScript, focusing on clean layout, responsiveness, and usability.
